

Alex Lim
Software Engineer | Singapore
alex.lim@email.com | github.com/alexlim | linkedin.com/in/alexlim

SUMMARY

Software engineer with 4 years of experience building and operating backend services and web applications. Comfortable owning features end to end, from API design through deployment and monitoring. Looking to deepen distributed systems and platform engineering skills.

EXPERIENCE

Software Engineer, Nimbus Commerce Pte Ltd (Jul 2022 - Present)

- Design and maintain order-management microservices in Go and TypeScript serving 2M+ requests/day on AWS (ECS, RDS, SQS).
- Led migration of the checkout API from a PHP monolith to Node.js services, cutting p95 latency by 40%.
- Introduced contract tests and CI/CD pipelines (GitHub Actions), reducing release regressions.
- Mentor two junior engineers; run design reviews for the payments squad.

Junior Software Engineer, Kestrel Labs (Jun 2020 - Jun 2022)

- Built REST APIs and internal dashboards with Python (FastAPI) and React.
- Implemented PostgreSQL schema changes and query tuning for reporting loads.
- On-call rotation: triaged production incidents, wrote runbooks.

EDUCATION

B.Eng. in Computer Engineering, Nanyang Technological University (2016 - 2020)

SKILLS

- Languages: Go, TypeScript, Python, SQL, JavaScript
- Backend: REST APIs, microservices, PostgreSQL, Redis, SQS, gRPC
- Cloud/DevOps: AWS, Docker, Terraform, CI/CD, GitHub Actions, monitoring
- Frontend: React, HTML/CSS
- Practices: code review, unit/integration testing, agile, incident response

PROJECTS

Open-source contributor: patches to a Go rate-limiting library (retry jitter, benchmarks). Personal project: self-hosted expense tracker (Next.js, Postgres).
